FALSI TELAI IN PVC

PROFILI IN PVC PER CONTROTELAIO

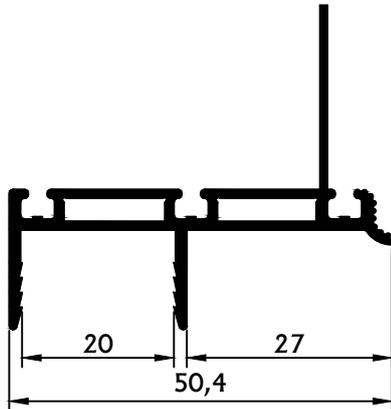

Il FALSO TELAIO nasce per semplificare il montaggio dei serramenti ed assicurarne le sue prestazioni (infatti una corretta installazione dell'infisso, permette un sicuro isolamento dall'ambiente esterno che sia acustico o climatico), in più facilita il compito degli operatori edili che devono installare il controteelaio. I falsi telai in PVC hanno il grosso vantaggio di rendere superfluo il montaggio del coprifilo esterno, e di ridurre i tempi di montaggio.

La MEUCO GOCCIOLATOI è lieta di presentare la nuova linea di profili in PVC per falsi telai, che grazie alla sua GRIGLIA PER INTONACO garantisce un'aderenza duratura sull'intonaco e riduce la possibilità che quest'ultimo si stacchi dal controteelaio e quindi un elevato grado di finitura. Questo risultato è stato raggiunto grazie ad uno studio approfondito sul prodotto, ed attraverso gli immancabili consigli dei nostri clienti.

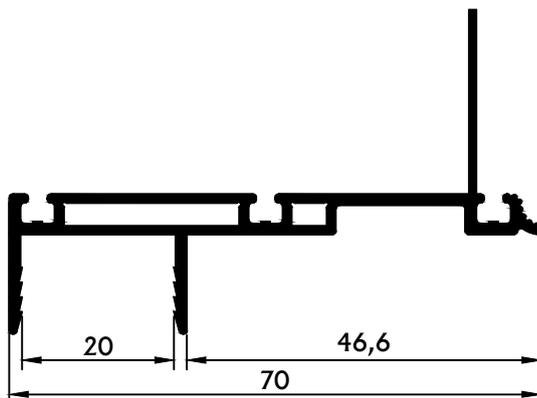

I controtelai MEUCO sono stati testati presso un' istituto accreditato secondo il sistema di posa "Gold".
